Is there clutter? \_\_\_\_\_

Are there potential safety hazards? \_\_\_\_\_

Potential safety regulations related to equipment: \_\_\_\_\_

Is there a need for security during transportation? \_\_\_\_\_

### Slanted Shelf, Security, and over-the-road transportation needs

### Notes

## Storage Solutions: Bins and Totes Production and Work in Process Carts

## TableWorx Platform:

Equipment Stand, Productivity Work Center, Task Station, and more.

## Reference for The Environment for Shelving and Storage

### Cold Areas

#### Type 304 Stainless Steel

Wire or solid polished stainless steel addresses the most aggressive applications and environments. All stainless solid and wire options exist for high temperature automated cart wash an autoclave options.

### Tear Resistant

#### MetroMax® i

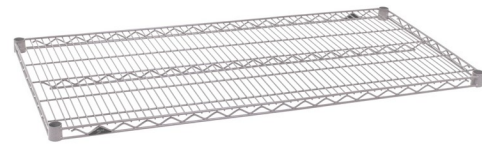

All plastic with stainless steel corners, removable shelf mats and built-in Microban.

### Humid Areas

#### Metroseal Gray Epoxy

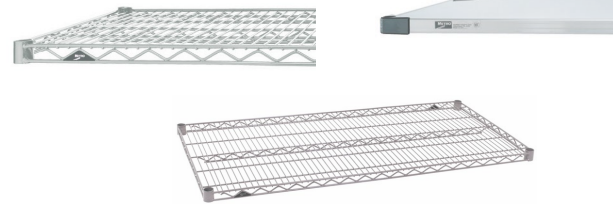

Corrosion resistant finish for harsh environments with a 12-year warranty against rust and corrosion. Microban antimicrobial is built into the finish to keep the product "cleaner between cleanings".

### Dry Areas

#### Chrome Plating

The "real" nickel-chrome finish for dry, low humidity environments, Metro's durable chrome finish includes a protective lacquer coat.

## Maximize Storage with High-Density Systems
