

ADVANTAGE

Aurora Safety Sweep for Mechanical Assist High-density Mobile Carriage System

The Aurora Safety Sweep for Mechanical Assist carriages is an exclusively designed safety feature intended to add to the user safety of an Aurora High Density Mobile Storage System.

If your workspace utilizes an Aurora High-Density Mobile Mechanical Assist System, or you are contemplating enhancing your office with this cost-effective high-density storage solution, you may want to consider a Mechanical Safety Sweep. This product is an outstanding addition to the Aurora Mobile Mechanical Assist System, offering added protection for both people and objects in the storage area.

Design: Positioned at the leading edge of each movable carriage, on both sides of a mechanical assist carriage, the Safety Sweep is a user friendly, unobtrusive and reliable safety feature.

Protection: Aurora Mechanical Safety Sweep is designed to protect users and/or objects in an open aisle by stopping the moving carriages when activated by a user within an open or closing aisle.

Features of the Aurora Safety Sweep include:

- The Safety Sweep is 4" in height and runs the full length of the aisle/movable carriages.
- The Safety Sweep is activated by only 3 lbs. of effort along the leading edge, and when activated, will stop the carriage immediately upon contact.
- The Safety Sweep will automatically reset.
- Powder coat paint finish is available to either contrast the carriage in safety yellow or safety orange (at an additional charge) or match the carriage color with red and white stripe demarcation tape for quick identification and user safety.
