

CANNABIS VERTICAL GROWING

For the last few years, the increasing legalization of cannabis has been a growing story. And at Aurora Storage, we have a solution for every story. We've incorporated Vertical Growing Racks into our already deep product offering to allow for the maximization of crop yields in the Cannabis Industry.

Mobile Storage for Vertical Growing

We have developed a patent pending complete growing system that allows for the minimum use of floor space while maximizing vertical space to increase crop yields by up to 4-times as much as traditional vertical growing systems. We can build a custom system to fit in any space, while integrating Grow Lights, Irrigation and Drainage Components to provide you with the most efficient, turn-key growing system in the space allowed.

Features

- Easy Operating Mobile Carriages provide smooth guided wheel on rail
- Grow Lights, Irrigation and drainage integrated in the Frame
- Vertical Grow Racking made from modular components
- 31 Available Colors
- Limited Lifetime Warranty
- Available in both Manual and Electric Systems

Other Applications

- Hemp
- Hydroponic Growing
- Compact Flowering Gardens
- Compact Produce Gardens
- Urban Farming
