Times-2 Technology Outshines the Rest

Positive Position Control

No competitors offer this safety feature built into every Times-2. The Positive Position Control ensures a controlled and positive stop every quarter turn and prevents the rotational momentum that can occur with other free spinning push models.

Columnar Support

The Columnar Support is a base reinforcement that distributes weight more safely and evenly in the Times-2 than the rectangular designs used in other rotary cabinets. Times-2 cabinets can be loaded heavily on one side and lightly loaded on the other and the columnar support will maintain perfect weight balance during rotation for quiet and smooth operation.

Assembled Base & Bearing Raceway

The Times-2 base works with either a foot pedal or a hand control release and is fully manufactured, assembled, and lubricated for the life of the unit before leaving the factory. The Bearing Raceway and retainer keeps the bearings in place for precise operation.

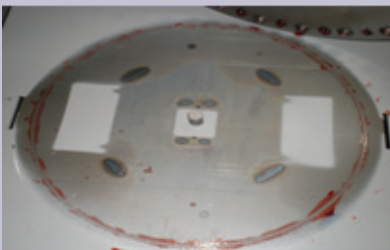

Full Height Center Wall Panel

Only Times-2 comes standard with a Full Height Center Wall Panel for stability and integrity. This eliminates unit racking seen in competitive units without such a panel. It also acts as a backstop to prevent items from dropping between shelves as happens in competitive units with cantilever mounted shelves or with cross bracing instead of a solid center panel.

Where does the competition stop short?

Datum has **no foot pedal**. Detents at every quarter turn produce an audible 'illusion' of stopping rotation, but each unit reacts differently depending on how an individual cabinet is loaded. Cabinet will intermittently stop, continue rotation, or stop short of the intended stopping point.

Tab also has **no foot pedal**, only detents every quarter of a turn and as such performs much like the Datum base outlined above with unpredictable rotation and stopping.

The Mayline ARC Rotary base is **unassembled**, requiring additional jobsite installation time. Ball bearings must be placed by hand in cups around the base and everything greased. Not an ideal procedure to be performed especially in locations that are move-in ready. The unit has **no foot pedal**, but a spring-loaded plastic plunger which aligns with notches in the rotary base every quarter turn to provide a detent. They do not have a positive stopping mechanism.

Competitor 1 Fit & Finish

Competitor 2 Fit & Finish

Fit & Finish

Our self-assessment of an 'excellent' quality rating for Times-2 might be construed as subjective until you see actual photos of other competitive units. Times-2 is manufactured to the tightest of tolerances from .015" - .030" so seams are flush and plumb, meeting without gaps.

Times-2 Fit & Finish

Interconnect Variable Heights

Times-2 is the singular rotary cabinet that can interconnect variable heights to optimize wasted space under low windows, building controls or other obstacles.

Canopy Top

Times-2 has a flush, finished Canopy Top that covers the side panels and gives further stability to the unit unlike the Mayline unit that only offers a canopy top at an extra cost.

Number of Colors

Only Aurora Storage has 31 cabinet colors in textured powder coat and an antimicrobial version all of which are eco-friendly with no Volatile Organic Compounds (VOC). Several of our colors are matched to popular contract furniture systems, so you can always find a choice to coordinate with your entire project. We can match custom colors as another option.

Who has more dividers, drawers, and accessories?

Aurora Times-2! We have more accessories to store everything. With eight different shelf divider heights you can organize binders, totes, cds and notebooks – far more than just files! Choose from eight drawers for mixed media, small parts, pharmaceuticals, files, parking tickets, fingerprint cards and small office supplies.

Times-2 Accessories for Every Storage Need

- 8 Dividers
- 5 Magnetic Follower Sizes
- Electronic Keypad Lock
- Slat Wall
- Countertops
- Caster Kits
- 8 Drawer Options
- Specialty Drawers
 - Fingerprint Cards
 - Parking Tickets
 - Security Tub
- Wardrobe Kit
- Fabric Overlays
- Weapons Accessories
 - Handguns
 - Long Guns
 - Optics
- Collaboration Countertops
- Converter Bars
- Pass Thru Center Panel
